

Work Experience

2017–Now **StockX, LLC • (Remote), Senior Software Engineer.**

- Scaled software and organizational systems as the 10th engineer, to support 10x traffic and Engineering organization growth.
- Designed, implemented and iterated upon a pipeline for managing dynamic prices on Google Shopping. Almost half of the company's monthly marketing spend is invested in Google Shopping, resulting in it being responsible for a significant percentage of daily sales.
- Piloted full-time remote work for the company.
- Co-lead and assisted in the development of adding continuous integration and deployment (CI/CD) pipelines to all backend services.
- Contributed to the internationalization of the website (i.e., support for multiple currencies and languages).
- Mentored developers transitioning to Go as the company adopted the language on the backend.
- Established and enforced a testing infrastructure and runbook standard for backend services.
- Assisted in creating a centralized wiki to document system intricacies and design decisions.
- Migrated Go services to use a standardized, multi-stage Docker build, reducing Docker image size by 120%.
