

Work Experience

2017–Now **StockX, LLC** • Remote, *Software Engineer*.

- Piloted full-time remote work for the Engineering team as the first full-time remote employee in the company.
- Designed, implemented, maintained and thoroughly-documented a pipeline for managing a dynamic market's products on Google Shopping responsible for a large portion of the company's monthly marketing spend.
- Contributed to the internationalization of the website (i.e., support for multiple currencies and languages).
- Mentored developers transitioning to Go as the company adopted the language pervasively on the backend.
- Established and enforced a testing infrastructure and documentation standard for backend services.
- Developed a wrapper of the Redis library in Go to distribute load to read-only replicas.
- Migrated Go services to use a standardized, multi-stage Docker build, reducing Docker image size by 120%.
- Co-lead and assisted in adding continuous integration and deployment (CI/CD) pipelines to all backend services.
- Assisted in creating a centralized infrastructure wiki to document system intricacies and design decisions.
- Experienced scaling software and organizational systems as the 10th engineer and the company faced more than 10x Engineering organization and traffic growth.
